

NOW Organizations experience a variety of ‘last mile reporting’ challenges, where the processes are still very manual. By combining PwC’s deep industry perspective with our proven technology experience, we can help you solve problems across your business, leveraging the tech and data you already have.

WHAT Workiva is a cloud-based platform that integrates and centralizes all aspects of reporting, including ESG/sustainability, financial reporting, risk management and compliance (GRC) while enables a smoother and more transparent process for companies to collect, analyze and report their data to stakeholders.

WHY Workiva platform help companies to solve version control issues, internal consistency errors, decentralization of reports, inefficient collaboration as well as time-consuming roll-forward processes while providing unifying view for all important reporting areas and enabling simultaneous work.

How PwC can help you

"Transparency requirements are heavily increasing putting pressure for systems to collect and report data in an efficient manner. Together we help our customers build modern validated process to control and report the versatile data."

Antti Hyttinen, PwC Partner
